EDUCATION

Colgate University, Hamilton, NY | Bachelor of Arts **2023-2027**

- Major: Applied Mathematics; Minor: Biology
- Extracurriculars: Biostatistics Tutor (2025) & Club Volleyball Officer (2023-Present)
- Related Coursework: Investigations in Computational Biology (MATH/BIOL 481), Biostatistics (BIOL 320), Numerical Analysis (MATH 376), Data Analysis I (MATH 354), Probability (MATH 316)
- Study Abroad (Spring 2026): University College Cork (Ireland)

Programming Languages

R, MATLAB, Python, L^AT_EX

EXPERIENCE

Dr. Bineyam Taye Epidemiology Lab

Computational Lab Researcher

Colgate University

Feb 2024 - Present

- Researched effects of socioeconomic and environmental factors on the gut microbiome of Ethiopian school children using statistical analysis in R; Transformed and personalized existing lab techniques
- Presented a [poster](#) in the spring of 2025 with other biology students; manuscript in-progress
- [GitHub](#)

Colgate Data Science Collaboratory

Data Science Intern

Colgate University

Sep 2024 - Jul 2025

- Programmed and developed [website](#) for the Colgate Data Science Collaboratory using RShiny under Dr. William Cipolli
- Performed mixed effect regression analysis for study on aging and metabolism in dogs for Dr. Ana Jimenez; presented [poster](#) for the summer

Dr. Melissa St. Hilaire Data Science Lab

Biostatistics Researcher

Merrimack College

Jun 2024 - Aug 2024

- Aided Dr. Melissa St. Hilaire of Merrimack College in ongoing mathematical biology and biostatistics human research
- Optimized human circadian rhythm model in MATLAB
- Cleaned and analyze human biological data pertaining menstrual cycle, sleep, and attention using R
- [GitHub](#)

State Representative Joey Andrews (MI-38)

Data Science Intern

St. Joseph, MI (Hybrid)

May 2024 - Jun 2025

- Compiled county and city voter data from Michigan SOS; spearheaded voter data project by improving efficiency and automating data mining to be completed in a fraction of time using R
- [GitHub](#)

Undergraduate Thesis: Dr. Ahmet Ay Lab

Dietary Intake Influences GI Health Outcomes via the Gut Microbiome and Metabolome in Ethiopian Schoolchildren *Fall 2025*

- Collaborated with biology student and analyzed dietary, microbiome, and metabolomics data in R to understand how diet affects the gut microbiome, metabolome, and health outcomes
- Discovered dietary effects on α & β diversity
- Found microbes and metabolites that mediated the relationship between diet and health
- Predicted health outcome based on dietary, microbiome, and metabolomic data with machine learning
- [GitHub](#) & [poster](#)
